Green Is the New Blue – Environmental Majors

Wesleyan College

Environmental Studies and Sustainability - Major (B.S.) / Minor

Environmental Studies is an interdisciplinary field that draws on knowledge and analytical tools from many areas of study to understand the function of natural ecosystems, the effects of human societies on the environment, and the role that the environment has played in shaping human cultures and artistic endeavors. The major in Environmental Studies and Sustainability prepares students for careers in policy-making, education, conservation, government service, research, and the arts. Students will also be well prepared to work for non-governmental organizations or enter into post-graduate studies in environmental law, urban planning, and scientific disciplines such as ecology.
